

Jerry Keto Bio

Mr. Keto has over 33 years of increasing leadership experience in the nuclear industry with strong working knowledge in the areas of decommissioning and nuclear waste. He has been in a leadership role in the successful decommissioning of the Maine Yankee and the Shoreham nuclear power plants and has led many related projects in transport and disposal of nuclear waste and used fuel. Here at OPG, Jerry looks after the financial planning and preparation for the decommissioning of all 20 OPG reactors and is also responsible for the licensing and construction of the OPG DGR for Low and Intermediate level Waste and oversight of OPG's liabilities for the NWMO Used Fuel Repository or APM.
