

**Haidy Tadros, MSc**

Director General Directorate of Nuclear Cycle and Facilities Regulation, Canadian Nuclear Safety Commission (CNSC)

Haidy Tadros has been with the CNSC since 2006 and has held several technical and leadership roles in the areas of radiation protection, integrated management systems, organizational change management, licensing new nuclear technologies and major projects management. In her current role as director general of the Directorate of Nuclear Cycle and Facilities Regulation, she oversees the CNSC's nuclear fuel cycle regulatory programs, which span a broad range of complex facilities from uranium mines and mills, nuclear processing facilities, research reactors, and waste and decommissioning facilities.

Prior to joining the CNSC, Haidy was a radiation protection specialist at the Ottawa Hospital overseeing the use of nuclear substances in the research laboratories and nuclear medicine department. Haidy completed her Master's degree in Biomedical Sciences at Université de Montréal.
