

Biography Dale Huffman

Dale Huffman is the Vice President of Health, Safety, Environment and Regulatory Relations (HSE-RR) at AREVA Resources Canada Inc., headquartered in Saskatoon, with major uranium mining operations in Northern Saskatchewan. Dale obtained his Bachelor of Science in Chemistry at Queen's University and earned a Master of Business Administration at the University of Saskatchewan. As Vice President, HSE-RR, Dale develops approaches to meet provincial, national and international regulatory requirements, and oversees their implementation within existing operations and for new project development. Prior to his role as Vice President, Dale held positions of increasing responsibilities including as Superintendent of Environment, Health and Safety and Manager of Radiation Protection and Special Projects at the McClean Lake operation, contributing to his 10-year tenure at AREVA. Outside of AREVA, Dale shares his knowledge and expertise of radiation protection and uranium mining through his participation in local, national, and international professional organizations such as the Saskatchewan Mining Association, World Nuclear Association, International Atomic Energy Agency, and OECD/Nuclear Energy Agency.
