

**Andrew R. Griffith**

Associate Deputy Assistant Secretary  
for Fuel Cycle Technologies (NE-5)  
Office of Nuclear Energy  
U.S. Department of Energy  
1000 Independence Ave, SW  
Washington, DC, 20585

Andrew Griffith has been Associate Deputy Assistant Secretary for Fuel Cycle Technologies since July 2014. Since July 2015, Mr. Griffith has been leading the development of a durable solution to spent nuclear fuel and high-level waste management in the U.S. These activities include the development of an integrated waste management system (interim storage, transportation, and disposal capabilities), the development of a consent-based siting process for nuclear waste facilities, and the research and development of technologies that will improve spent nuclear fuel and high-level waste management capabilities into the future.

Starting in 1990, Mr. Griffith has served in various leadership positions supporting the improvement of nuclear waste management operations and experimental capabilities in both the Office of Nuclear Energy and DOE's Office of Environmental Management. During his time with DOE, he has focused on advanced fuel cycle research, nuclear material stabilization, as well as spent nuclear fuel and high-level waste management. Before joining DOE, Mr. Griffith served in the U.S. nuclear submarine force and continued serving in the Naval Reserve after joining DOE. He retired from the Naval Reserve as a Captain in 2009.

Mr. Griffith received a B.S. in Naval Architecture from the U.S. Naval Academy in 1983 and an M.S. in Technology Management from the University of Maryland University College in 1997.
