

Patrick O'Sullivan - BIO

Patrick O'Sullivan works as a decommissioning specialist at the International Atomic Energy Agency in Vienna. This role includes managing the IAEA's International Decommissioning Network, a platform for collaboration involving specialists from implementing and regulatory organizations involved in decommissioning across the globe. In his previous career he has worked at the OECD Nuclear Energy Agency, also in the field of decommissioning, and prior to that at the Nuclear Research Group in the Netherlands. He began his career in the UK nuclear energy industry, where he worked for the Central Electricity Generating Board on reactor design and safety studies and subsequently with Nirex, the waste management organization which subsequently became part of the Nuclear Decommissioning Authority.
