

Stéphan Chapdelaine

Advisor – Environment, Performance & Guidelines and Team Coordinator – Environment at Gentilly-2

Stéphan Chapdelaine graduated from Université de Sherbrooke in 1994 with a bachelor's degree in science (physical geography). He joined Hydro-Québec that same year, as an environment specialist in charge of the organization's hydropower stations. In 2007, he became an environment specialist for Gentilly-2 nuclear station. He supervised the rehabilitation and oversaw the environmental compliance monitoring at numerous contaminated sites for the organization. At Gentilly-2, he is chiefly in charge of the radiological environmental monitoring program, as well as the control and monitoring of radiological emissions and the management of radioactive waste. Since January 2013, he has contributed to every phase of the nuclear decommissioning plan involving an environmental aspect.
