

Donald Olivier, Eng.

Director – Facilities at Gently-2

Donald Olivier graduated from the École de technologie supérieure in 1994 with a bachelor's degree in civil engineering, and has been working for Hydro-Québec since 2005. He started out as Manager – Dams for the Direction des Cascades at Hydro-Québec Production, where he was in charge of ensuring dam safety at 32 hydropower facilities. He led numerous spillway refurbishment and dam reconstruction projects. In March 2015, he was appointed Director – Facilities at Gently-2, where he oversees the decommissioning project and manages all operations on the site. Before joining Hydro-Québec, Mr. Olivier worked as a project director in IT.
