

Steve Plante, Eng.

Manager – Technical Support

Steve Plante has been with Hydro-Québec, working at Gentilly-2 NGS, since 1991. He was a systems engineer for steam generators and heat transport system auxiliaries until 2006, when he took charge of the PHT, moderator and D2O management group. From 2009 to 2012, he worked on the refurbishment project, preparing the draining and lay-up for most of the systems associated with the reactor. Since 2014, he has served as Manager – Technical Support in the plant's transition to a safe storage state. He holds an engineering degree from Université de Sherbrooke.
